PROFESSIONAL SUMMARY

Software Engineer with 1+ year of professional experience in web and application development, working with JavaScript, React, React Native, Node.js, REST APIs, and databases. Experienced in developing client websites and contributing to production applications including TokensBoy and FME. Familiar with Git/GitHub, cloud platforms, automated testing, and Agile development practices, with additional project experience in AI/NLP applications.

TECHNICAL SKILLS

Programming:	Python, JavaScript, SQL
Frontend:	HTML5, CSS3, React, React Native
Backend:	Python, Node.js, REST APIs
Database & Tools:	MySQL, Git & GitHub, Postman
Software Testing:	Selenium, Manual Testing, Automation Testing, API Testing, SDLC & STLC
Hosting & Deployment:	Hostinger, GoDaddy, DNS & HTTP/HTTPS

EXPERIENCE

Senior Software Engineer	2026 – Present
Junior Software Engineer	2025 – 2026

Navabharath Technologies

- Developed and maintained responsive websites for multiple clients using modern web technologies (React, JavaScript, HTML, CSS), translating business requirements into functional and user-friendly solutions.
- Contributed to the development and enhancement of the **Tokens Boy application** by building scalable REST APIs with Node.js and integrating them with the front-end, effectively resolving application issues.
- Developed and enhanced features for the **FME application**, leveraging MySQL for data management and system optimization.
- Collaborated in Agile environments to analyze requirements, develop solutions, and execute comprehensive testing to deliver projects within strict timelines.
- Utilized Git and GitHub for version control, source-code management, and seamless collaborative development.
- Orchestrated application deployment, troubleshooting, and maintenance across multiple cloud environments using AWS and Microsoft Azure.

Software Testing & Automation Trainee (Intern)	Jun 2025 - Oct 2025
--	---------------------

Fireflink at QSpiders | Bangalore

- Designed and executed manual and automated test cases using Selenium WebDriver in Agile environments.
- Gained hands-on experience with AI-driven test automation tools, assisting in real-time execution and defect tracking.

Tech: Selenium WebDriver, Manual Testing, Automated Testing, Agile, Defect Tracking, AI Test Automation

PROJECTS

Dr. Madhuram Chowdry (Modern Healthcare & Patient Care Platform)

- Designed and developed an intuitive, responsive healthcare web platform to showcase doctor expertise, medical services overview, and diagnostic care facilities.
- Integrated a responsive appointment booking UI with dynamic time slot selections for streamlined patient scheduling.
- Optimized website performance, loading speed, and cross-browser responsiveness across devices.

Tech: React.js, JavaScript, HTML5, CSS3

Srinivasa Dental Clinic (Modern Dental Clinic Portal)

- Engineered and deployed an end-to-end responsive clinic website highlighting specialized dental treatments, smile gallery, and patient care facilities.
- Configured domain settings, managed DNS record routing, and established SSL security and hosting on Hostinger.
- Implemented a clean UI design system optimized for fast load times and seamless cross-browser accessibility.

Tech: React.js, JavaScript, HTML5, CSS3, Hostinger

TokensBoy App (Digital Queue & Clinic Management System)

- Developed a cross-platform mobile application using React Native and built Node.js REST APIs for token and patient data management.
- Implemented real-time token and queue synchronization between Doctor and Patient applications.
- Deployed backend services on Microsoft Azure and successfully published both applications to the Google Play Store.

Tech: React Native, JavaScript, Node.js, Azure, GitHub, HTML, CSS

AI Therapist NLP-Based Intelligent Conversational System

Major Project - 2025

- Designed and developed an AI-powered virtual therapist leveraging Natural Language Processing (NLP), Natural Language Understanding (NLU), and Machine Learning to analyze user conversations and generate contextually relevant responses.
- Built a modular architecture integrating a web-based conversational interface, messaging layer, NLP processing pipeline, custom-trained dataset, and predictive classification model.
- The system processes unstructured user text, identifies underlying intents and conversational patterns, performs intent classification and response prediction, and delivers appropriate responses in real time.

Tech: NLP/NLU, Machine Learning, Intent Classification, Text Preprocessing, Predictive Modeling, Custom Dataset Training, Conversational AI, Web Interface

EDUCATION

Bachelor of Engineering – Information Science and Engineering

2025

BGS Institute of Technology

- CGPA: 8.1/10
